

Development update for Members

Internal document
Development Department

Introduction

This document includes a number of updates for Members on the projects and initiatives of the Development Department. Members agreed at Development Committee in October 2009 that, while they wanted to be kept informed on the progress of initiatives within the department, they would prefer to receive regular update reports rather than formal committee reports.

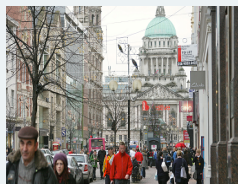

The purpose of this report is therefore to make sure that the only papers being submitted to committee are those that require a decision. It does not replace the formal committee reporting process – it should complement it.

If Members feel that any of the items included within this update should be discussed by committee, they simply need to contact **Members Services** and request that a paper be submitted to the next committee.

This update report will be issued every two months by Members Services on behalf of the Development Department and it will be made available to all Members.

Contents

Project

Page

Markets
