Total:	7,890	

This Emergency Planning Manual has been compiled by the Community Resources Unit in Community Services to provide a one-stop resource for emergency planners in the event of an incident, severe weather, civil disturbance or other emergency situation.

We have 22 directly managed community centres and six independently managed centres situated across the city; north, south, east and west. It has long been recognised that our community centres play a pivotal role in delivering services to the citizens of Belfast. This is particularly true in times of stress.

By gathering together all of the important information regarding location, occupancy, heating, car parking etc in one place, this manual will help to ensure that the most appropriate facilities can be chosen and that they are accessible in a way that enables a swift and efficient response to local needs.
