

A SIMPLE, SCALABLE ARCHITECTURE

- A small number of Cisco LoRaWAN Gateways provide citywide coverage.
- Initially See.Sense sensors on City Bikes provide city data (Later, other sensors can be added to meet the cities demands.)
- BT Data Hub provides a central data store, standardises and licences data.
- Data Available to the City, SMEs, Apps & Universities.
- Queens University supports See.Sense to analyse the data to turn it into mobility intelligence.
