Managing and Delivering the Plan

### Introduction

#### **Our Vision**

The Belfast Agenda is Belfast's first community plan which sets out a leadership framework that will support inclusive economic growth and improved services for residents and businesses in Belfast. This shared plan built by a partnership of organisations and led by the Council to work better together is to create a new vision for Belfast by 2035. It strives to make Belfast the best living experience as one of the most attractive cities in the UK to live, work, study and invest.

#### How we can deliver?

This Programme for delivery sets out how Belfast City Council (BCC) will contribute to the achievement of the priorities set out in the Belfast Agenda. The programme of work was developed with the various council departments and outlines key milestones and activities that will be delivered over the coming year from services right across the organisation. In order to support delivery a clear process had been put in place with ongoing monitoring and evaluation of progress including regular reporting to elected member and chief officers on both individual projects and the overall plan.

In line with the Belfast Agenda this plan relates to the five immediate priorities and stretch goals providing further detail on how the Council will deliver against the vision, stretch goals and objectives.. Some projects are more developed than others and over the course of the year work will continue to further define key elements of the plan to ensure the right activities are identified to achieve the key outcomes.

The Council is also responsible for developing a Local Development Plan (insert online link) for Belfast which will shape the physical future of the city – including housing, roads and other infrastructure and this will run alongside our Belfast Agenda. This 15 year plan framework will support economic and social needs in the city and will facilitate growth by coordinating public and private investment to meet the sustainable needs of our City. (Consultation stage at present)

The BCC Capital Programme is a rolling programme of investment which will improve existing Council facilities or provides new Council facilities. These alongside our service plans will make a significant contribution towards the achievement of the Belfast Agenda, making our City an excellent place to live and work in.

This plan is a living document and will be added to and updated throughout the year to ensure it reflects the organisations priorities and supports the ongoing delivery of activities and reporting of milestones. It should also be noted that further detail on a number of projects will also be included in various council strategies and plans and where appropriate will be the subject of ongoing reporting to the relevant standing committee. High level updated will also been included in the overall reporting of this deliver programme

Our priorities areas are below:

- 1. Growing the Economy
- 2. Living Here
- 3. City Development

- 4. Working and Learning
- 5. Leadership and Organisational Infrastructure

# Growing the Economy

Throughout the Belfast conversation the council has been told that people want a thriving and prosperous economy for our city where as many people as possible have the opportunity to contribute to and benefit from this success. We want to see 'inclusive growth' in Belfast – this means creating more and better jobs; attracting new businesses and tourists to Belfast; improving living standards and earnings; and overcoming barriers to employ. We can strive to achieve this through the following workstreams below:

## Living Here

People have told us they want all Belfast's residents to lead healthy, engaged and fulfilling lives as part of vibrant, growing communities and neighbourhoods. People want Belfast to continue to be a culturally rich and diverse city that is compassionate, safe and welcoming to all. A city that will enable its residents to reach their full potential at every stage of life, whether that is through employment, education, volunteering, learning for fun, sports or participating in the arts, culture, and heritage. We can strive to achieve this through the following workstreams below:

# City Development

Regenerating the city centre is key to creating the economic growth people told us they wanted to see. It is important to ensure the right mix of offices, retail, hotels, tourist attractions, creative industries, universities and colleges, and housing. We want to see improvement in our water, sewage and energy infrastructure and ensure that investment in our communities, schools, transport, health and leisure facilities, and parks and open spaces are planned in a way that allows people to get the most from them. We can strive to achieve this through the following workstreams below:

# Working & Learning

Having a good job is the most important way of improving life for many people in Belfast. The number of people out of work in Belfast is high compared with other cities. People told us that there are key issues including poor health, low skills and qualifications, and access to childcare which make it difficult for some people to return to work. We want to ensure people in Belfast have access to the best education, skills and employability opportunities, and that we do everything we can to connect people to good jobs. We can strive to achieve this through the following workstreams below:

### Managing and Delivering the Plan

The programmes and projects detailed within this plan have been developed as part of our programme planning process which identifies resources, clear lines of accountability and key deliverables. Chief Officers are responsible for overseeing the delivery of various elements of the plan with support from the programme and performance management team. The team also supports the Chief Executive by providing regular reports, escalating issues and providing assurance. This in turn is reported to members through the various committees. Approval of the overall plan including monitoring of its delivery is the responsibility of the Strategic Policy and Resources Committee.

In addition The Audit and Risk Panel provide assurance that the correct frameworks and processes are in place to support improvement in line with the Performance Duty detailed in Part 12 of the Local government Act.
